

## Pharmacy Medication Order Management

### Workflow Scheduler Application

Managing and monitoring coverage for your satellite locations present special challenges in a multi-site pharmacy operation. Unplanned staff fluctuations and shifting workloads make managing these complex organizations difficult at best.

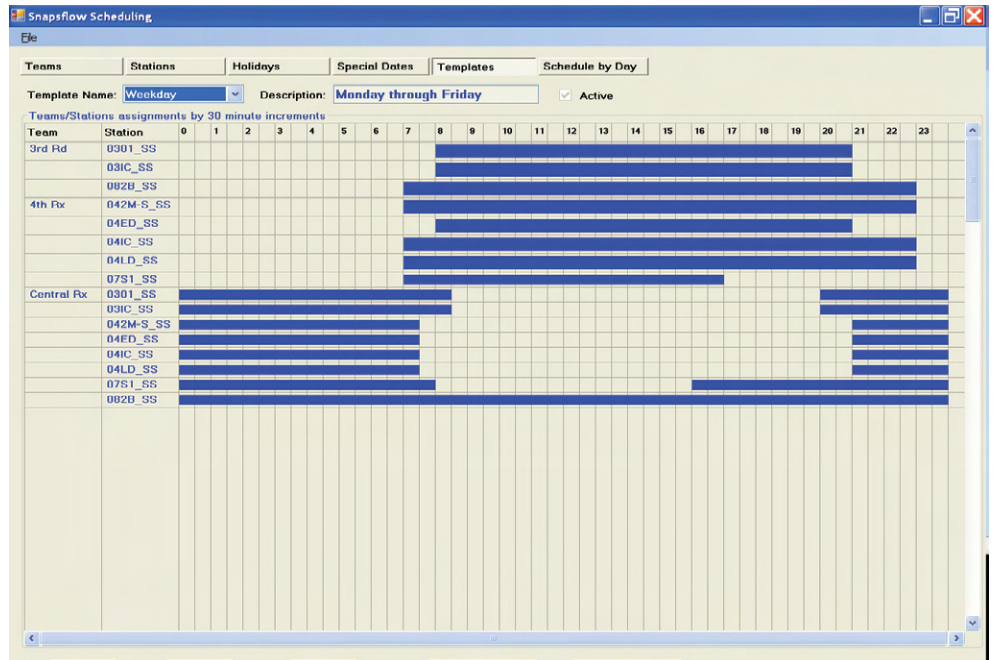

Metabolyst Healthcare offers a unique solution that simplifies the management of your remote operations. Our workflow scheduler puts powerful tools directly in your hands for building work teams, scheduling assignments and routing orders, all based on your internal workflow and processes.

Staffing assignments can vary by user, location, time or day, including holidays and special days.

Our scheduler simplifies the management of remote sites and satellite locations and lets you easily cover planned or unplanned staffing fluctuations.

Metabolyst Healthcare offers a proven, cost-effective solution that automates your paper-based med order processes. We tailor our application to mirror your existing workflows, which accelerates user adoption and minimizes disruptions to your operations.

With our advanced tools and proven technologies, each application can be implemented within two weeks, providing immediate benefits to your organization. With over two decades of experience, Metabolyst has the knowledge and experience to streamline your paper-based processes.

*Graphical display lets you see staffing coverage at a glance for all locations, local and remote*

#### **Metabolyst integrated scheduler offers enhanced workflow management features including:**

- Straight forward and intuitive GUI designed for use by pharmacy supervisors and managers
- Create work teams by user, location, time, or day
- Automatically reroute orders based on location, order priority, day, date, time, or dynamically on demand
- Configurable templates for weekday, weekend, holiday, or special days such as seminars and conferences
- Gaps in pharmacy coverage are automatically flagged by the system
- View orders across teams for enhanced workload management
- Easily customize assignments and routing to mimic your internal workflow and processes
